EUREKA™
A Natural Fermentation Aid

**A Healthy Forage Aid
for Organic Farming**

SAVE THE SILAGE YOU'VE WORKED SO HARD FOR

Preserving Silage

CUT DRY MATTER LOSS IN HALF

% LOSS:	UNTREATED	EUREKA
Corn Silage	9.5	3.1
Sorghum Silage	5.4	4.5
Alfalfa Silage	4.7	2.0
Average Loss	6.5	3.2

Cut dry matter loss by as much as half, and save the silage you've worked so hard for!

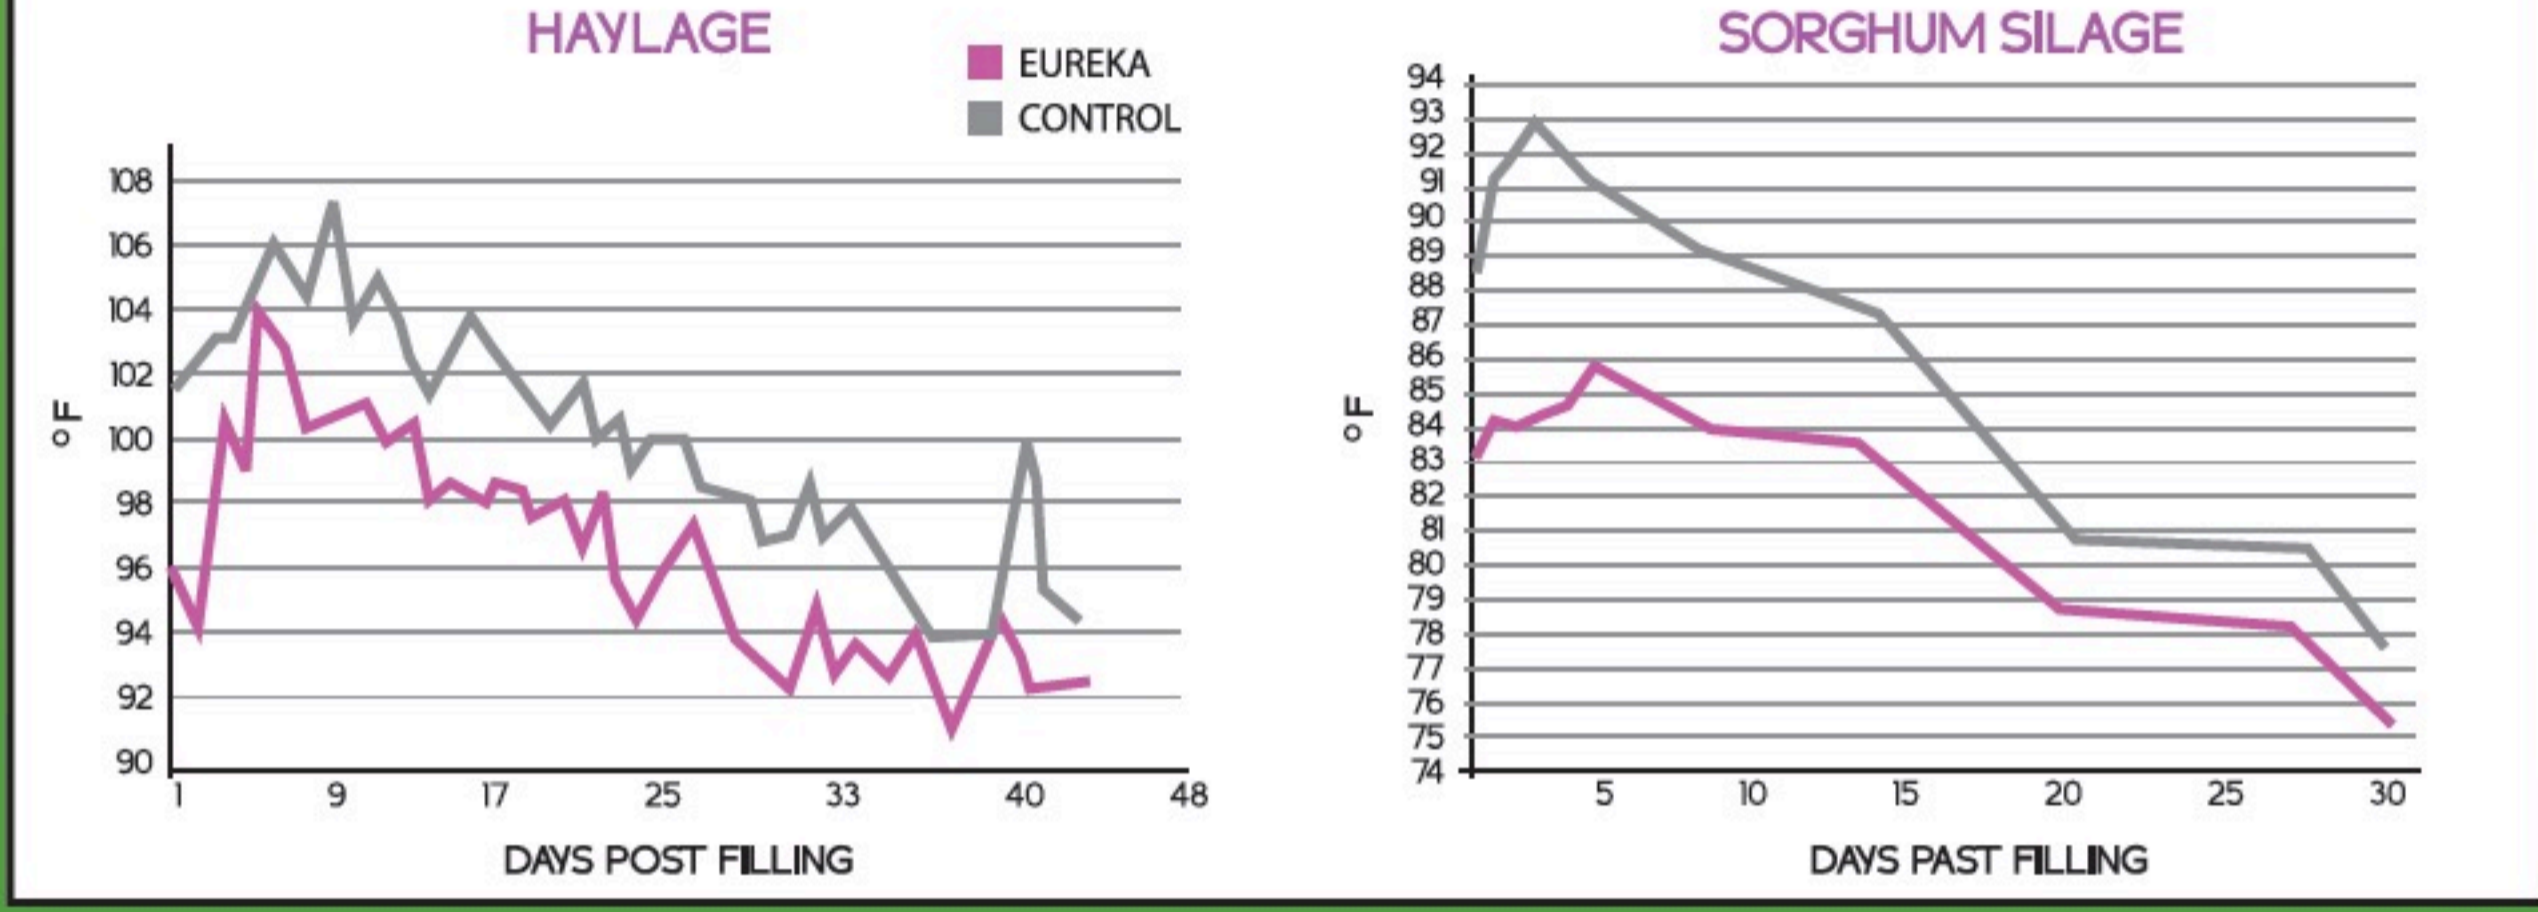

- Eureka is an all natural fermentation aid that is OMRI listed
- Eureka will enable silages to produce their own natural preservative
- This allows for the retention of valuable nutrients that are found in fresh-cut forage

GREENER MORE NUTRITIOUS HAY

EUREKA™, a Natural Fermentation Aid

ENSILING TEMPERATURES: UNTREATED VS EUREKA TREATED

- Eureka reduces the heat that builds up in hay after baling
- Eureka allows you to bale at higher moistures
- Both of the above allow for more leaf retention in alfalfa
- Results in greener more nutritious hay
- We know that organic dairies pride themselves on their commitment to quality
- Quality starts with a healthy cow, and healthy cows start with healthy forages
- Eureka will work to inhibit the growth of molds that can produce harmful toxins

Healthy Cows Start with Healthy Forages
